BURN BARRIER™ – PF-1 CLEAR FIRE RETARDANT COATING

BURN BARRIER™ – PF-1 is a clear, waterbase fire retardant coating for use on polyester flowers and plants. It is paint-like in appearance and dries to a clear satin finish in approximately 12-16 hours. Coated plants are washable by sprinkling with mild soap and rinsing with water.

Application:

Stir well with paddle before using. The coating is applied by either dipping or spraying. Dipping is recommended for uniformity. Use heavy duty spray equipment for spraying. Protect areas to avoid damage to property. Minimal reduction with water may be necessary to obtain a lower consistency for uniform application. After applying, leaves that are sticking must be separated while wet. Test a small sample before starting the project. Test for flammability.

WARNING:

USE WITH ADEQUATE VENTILATION. Avoid prolonged breathing of vapors and prolonged contact with skin. After using and before eating or smoking, wash hands thoroughly. Do not take internally. Keep container closed when not in use. **KEEP OUT OF REACH OF CHILDREN.**

Information provided herein is based on tests believed to be reliable. Inasmuch as Fire Retardants Inc. has no control over the use or application to which others may put this material, we make no guarantee or warranty. Our products are sold on the condition that each user of the material make their own evaluation to determine the material's suitability for their own particular use.

CAUTION: It is recommended that a test application be completed prior to end use.
